Summary

AI/ML Engineer with 2+ years building and deploying production Retrieval-Augmented Generation (RAG) systems at scale (10k+ users). Specialized in agentic LLM pipelines, hybrid retrieval (BGE-M3 + SPLADE-V3 embeddings), and self-hosted / on-prem large language model (LLM) deployment — shipping multiple AI platforms end-to-end, from custom document-parsing pipelines to Dockerized deployment on Linux servers.

Skills

- **AI/ML:** RAG pipelines, Large Language Models (LLMs), Agentic workflows, Prompt engineering, Semantic search, Hybrid retrieval, BGE-M3 & SPLADE-V3 embeddings, LLM inference, Multi-provider LLM integration
- **Languages:** Python, JavaScript, TypeScript, SQL
- **Frameworks & Libraries:** FastAPI, LangChain, Angular, React, Next.js, Pydantic
- **LLM Providers:** Google Gemini, Vertex AI, Ollama (self-hosted), OpenAI-compatible endpoints
- **Databases & Vector Stores:** Qdrant, Faiss, PostgreSQL, MongoDB, SQLite
- **DevOps & Cloud:** Docker, nginx, PM2, RHEL / Linux server management, Google Cloud (GCP), Git, REST APIs, CI/CD
- **Document Processing:** pdfplumber, python-docx, custom chunking pipelines
- **Integrations:** WhatsApp Business API, Telegram Bot API

Experience

AI/ML Engineer (Senior Associate)

Jun 2024 – Present

SBI Life Insurance Co. Ltd., Mumbai

Built and deployed four production AI platforms on-prem (nginx + PM2 / FastAPI on RHEL), serving 10k+ users.

- **MyBuddy WhatsApp Chatbot (10k+ users)**
 - Agentic RAG across 3 domains (2k docs/domain in Qdrant)
 - BGE-M3 embeddings + custom PDF/DOCX chunking pipeline
 - 70% query-time reduction, 95% answer accuracy
- **Analytics Dashboard**
 - Real-time metrics from 10k+ MongoDB conversation logs
 - 85% manual reporting eliminated, 2x faster insights
- **Legal Assist Platform**
 - Angular / FastAPI document AI with bounding-box review UI
 - LLM change-analysis: 60% faster reviews, 98% accuracy
- **PayGet PWA**
 - Premium calculator + automated PDF collateral generator
 - 40% faster quoting, 3x daily policy proposals

Projects

Kubera — Autonomous Algorithmic Trading Assistant

- Autonomous NSE scanner: screens 190+ stocks daily via a weighted multi-factor model, then filters signals through a pluggable LLM news layer before firing Telegram alerts. *Python, LLM-agnostic (Gemini / Ollama / OpenAI-compatible), APScheduler, Pydantic, Docker.*

Compendium — Self-Hosted AI Journaling & Knowledge System [\[GitHub\]](#)

- Two-stage LLM pipeline that extracts entities from journal entries into a version-controlled Markdown knowledge base; uses index-as-discovery (vs. vector RAG) to surface cross-domain insights, with Zod-validated output. *Node.js, Fastify, React, Gemini 2.5 Pro / Claude (Vertex AI) / Ollama, SQLite, Git, Docker.*

Education

B.Tech in Information Technology

2024

Vidyalankar Institute of Technology, Wadala, Maharashtra

GPA: 9.17 | Honors in Artificial Intelligence and Machine Learning

Achievements

- GEM Award for outstanding performance, SBI Life Insurance (Jan 2026) — 4 production AI platforms shipped in first year
